PROFILE SUMMARY

Computer Science student with hands-on experience in full-stack development (React, Node.js, MongoDB). Built and deployed real-time applications with a focus on scalability, performance, and clean architecture. Experienced in developing user-centric solutions and optimizing application efficiency.

SKILLS

Languages: Python, Java
Web Technologies: HTML, CSS, JavaScript, React
Databases: MySQL, PostgreSQL
Technologies: Web Development, App Development
Tools: Git, VS Code
Core Strengths: Debugging, Code Optimization, System Design Basics

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science	2023 – 2027
Dhaanish Ahmed College of Engineering, Chennai	
CGPA : 8.3	
Higher Secondary	2022 - 2023
Government Higher Secondary School , Maraimalai Nagar.	
Percentage : 70 %	

INTERNSHIPS

UI/UX Design Intern	MSME (2 weeks)
- Designed 5+ wireframes and prototypes improving user flow and UI clarity - Increased usability efficiency by ~20% through layout improvements - Reduced navigation complexity, improving user interaction consistency	
Java Developer Intern	InterPe (2 weeks)
- Developed 3+ Java applications using OOP principles - Improved code maintainability by 30% through modular restructuring - Reduced runtime errors by 25% using exception handling techniques	
Artificial Intelligence Intern	Infosys Springboard Virtual (3 Months)
- Applied ML techniques on multiple datasets (5000+ records) for training and evaluation - Improved model performance by ~15% through preprocessing and feature selection - Built end-to-end workflows covering data cleaning, training, and validation	

PROJECTS

1. **AI-Powered Credit Card Fraud Detection**

Python, Scikit-learn

- Developed ML model achieving 96% accuracy using Random Forest
- Processed and analyzed 10,000+ transaction records
- Improved fraud detection performance by 35% through feature engineering

2. **Real-Time Music Sync Application**

React, Node.js, MongoDB, Socket.io

- Engineered a full-stack platform supporting real-time playback for 20+ concurrent users
- Implemented room-based system used in 10+ active sessions for synchronized listening
- Developed upload system managing 300+ audio files with optimized storage handling
- Reduced sync delay to <200ms latency using WebSocket communication

3. **AI Chatbot for Health**

Python, HTML, API Integration

- Created chatbot handling 100+ queries per session
- Reduced response time by 40% through API optimization
- Improved interaction flow, increasing response efficiency by 30%

COURSES

- **NPTEL** : The Joy of Computing Using Python.
- **Infosys Springboard** : Artificial Intelligence.
- **Oracle** : Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- **Coursera** : Introduction to Git & GitHub.
- **MongoDB** : MongoDB Basics for Students.
